

2A For masonry installation

Diagram 2A illustrates the installation of the bracket into a masonry wall. The main view shows the bracket with several screws already attached. Three circular callouts provide detailed views of the installation steps:

- 1**: Shows the bracket being inserted into a pre-drilled hole in the masonry.
- 2**: Shows a screw being driven into the bracket from the inside.
- 3**: Shows the bracket fully seated in the wall with a screw head visible on the exterior.

2B For drywall installation with support structure
