COMMERCIAL DOORS

SECURITY, STRENGTH AND ENDURANCE

COMMERICAL DOORS THAT WORK HARDER FOR YOU.

Why do Parkwood Commercial Doors work harder for you?

We use proven, traditional joinery techniques, in conjunction with innovative technology, to ensure all our doors perform for years to come. We've specialised in constructing aluminium and composite doors that are unrivalled for strength and durability. And all our commercial doors come with a 10-year warranty.

Parkwood is a privately owned, New Zealand family business that has been manufacturing and distributing all kinds of doors, from traditional, wooden villa styles to the most secure commercial doors, for more than 25 years. Since we were established in 1993, the Parkwood name has become synonymous with expert craftsmanship and high-quality manufacturing.

CHOOSE PERSONNEL ACCESS AND INTERIOR COMMERCIAL DOORS DESIGNED TO DO THE JOB

ALUMINIUM FRAMES

Doors can be pre-hung in frames (in timber or aluminium)

HARDWARE

Locks/Handles / Anti-Jemmy Strips /
Seals / Closers

Tough enough to withstand very harsh conditions, Parkwood's aluminium exterior egress doors are built using superior material technology.

Sturdy and suitable for high-traffic areas, such as airport buildings, shopping malls, or warehouses, where high security is of the utmost importance, this versatile range can be configured for multi-purpose industry situations, incorporating vision panels and air vents.

You can't make a safer choice than a commercial door from our Garrison range.

THE ALUMINIUM DOOR CORE

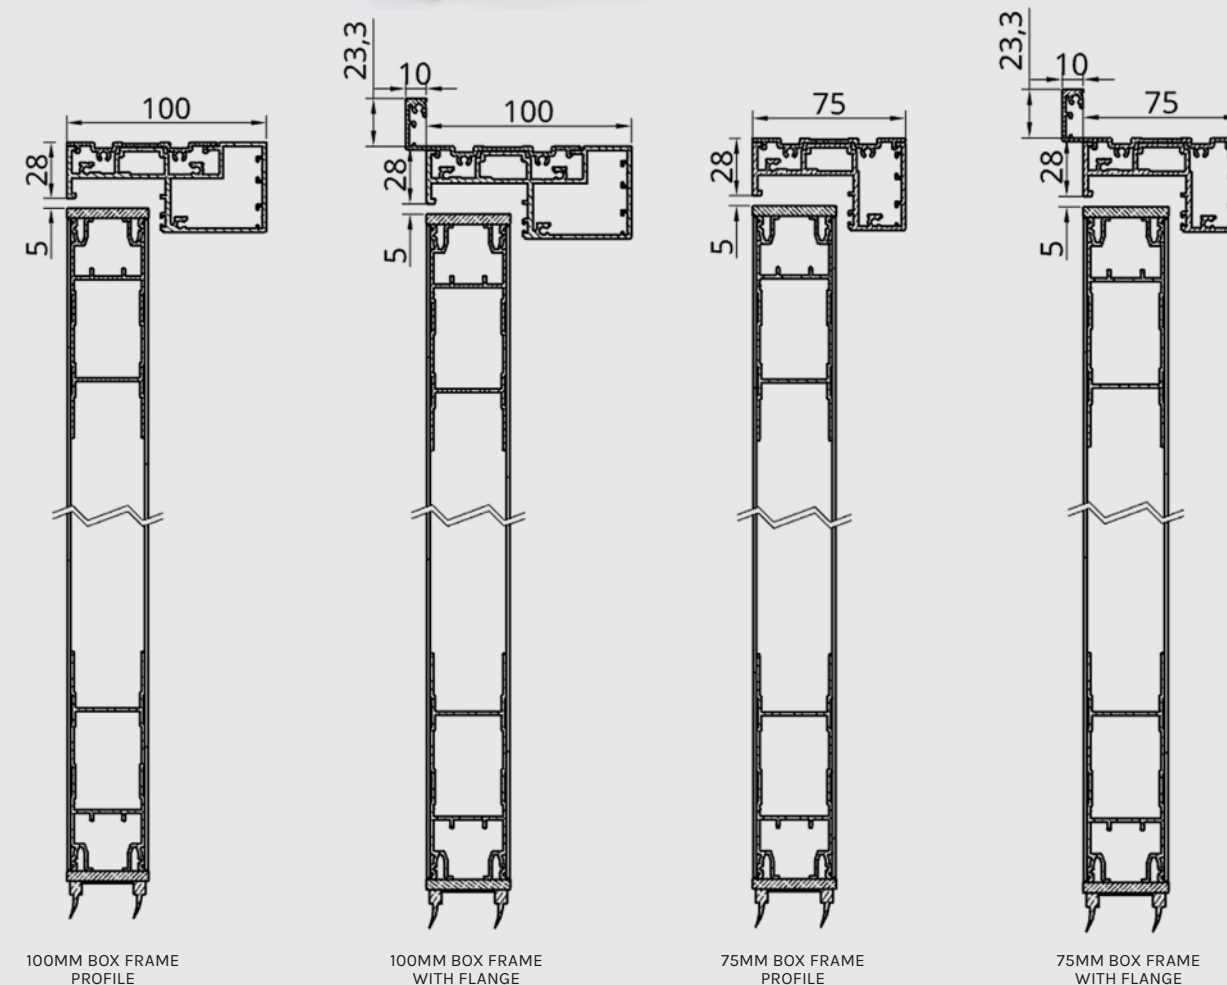

Aluminium box section down sides of door keeps it straight and square

Heavy duty aluminium extrusion top and bottom gives strength and fixing for door closers

The aluminium ribbed core gives the door a sturdy, stable and strong construction. This is joined to the face with high strength resin glue to stop delamination

Can be powder-coated to any colour for a durable finish

HIGH USAGE AREAS

- 1.6mm thick skins for durability and strong impact resistance
- Ribbed core for rigidity
- Thicker frame for wider stability and support
- Flush edges for a smoother feel with less protrusions

VENTILATION

- Angled slats to allow maximum airflow with minimal water intake
- Insect mesh option to prevent pests
- .294sm of air vent per square metre
- Powdercoated grilles to match door for a cleaner aesthetic

EGRESS TO WAREHOUSE

- Clean frame and door edge design with quality powdercoat finish
- Solid internal support for door closer and panic device installation
- Sturdy frame and door core allows a smooth opening for a fast exit
- Anti-jimmy bar option for optimal security

ENGINE & SERVICE ROOMS

- Robust design works in industrial areas smartly
- Twin fin weatherseal to bottom of door to prevent draughts and water penetration
- .294sm of air vent per square metre

CASE STUDY

DOOR TO DOOR WITH MAINFREIGHT

Parkwood was approached by Calder Stewart Construction to provide egress doors and interior doors for the new 4000m2 Mainfreight building being erected in Levin, Parkwood agreed. Parkwood's range of commercial doors were ideal to reflect Mainfreight's values and reputation.

Mainfreight has built a foundation on efficiency so needed doors that were durable and strong to suit the bustling nature of a busy and rapidly expanding logistics firm, along with easy accessibility. Parkwood's Resolute range of interior doors and Garrison range of exterior doors provided these attributes and more.

Matt Flint powder-coated Garrison exterior doors contrasted the well-known Mainfreight Blue colour, while the Resolute interior doors

were supplied ready to be painted (to match the Mainfreight colours) and stand as a focal point against the white walls.

Parkwood's close, on-going relationship with Mainfreight as its primary logistics choice, meant that the project had a more personal touch which was well reflected in both the workmanship of the doors and the communication offered to ensure everything was completed in a smooth and timely manner.

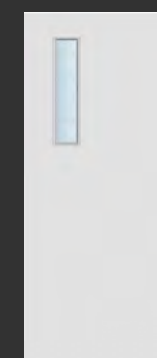

RESOLUTE
COMMERCIAL DOORS

Made for shopping malls, fast-food, wet and high-traffic areas, these composite doors are constructed of glass reinforced polymer, with no exposed timber.

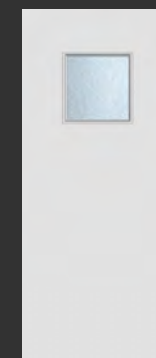

That means they're built to resist bowing, twisting, delaminating and swelling, with superior strength and excellent hygiene properties.
