WELCOME HOME

THE HOME COLLECTION

BEAUTIFUL DOORS FOR YOUR HOME

OUR BEAUTIFULLY CRAFTED DOORS CREATE A LASTING IMPRESSION.

We know that peoples' homes form the centre of their lives. We're passionate about making these homes a place where families come together to celebrate life's victories and special moments. It's a passion that goes right back to our beginning, in 1993, when the founders established a door joinery shop in Wanganui – not just because it was a central location, but because they wanted to have a positive effect on the economic circumstances of our workers and their communities.

For three generations, the family business has been a place where people are always the priority. Now, we're proud to offer Australia and New Zealand's biggest selection of doors.

Every door we create is meticulously designed and crafted, beautiful, bold and built to last – so you can enjoy a sense of certainty, belonging and security. Your doors will last generations, and make a home that's truly yours.

ALUMINIUM

SLEEK. VERSATILE. DURABLE.

All door designs are available in Thermtek or Strata construction

This thermally enhanced technology boasts a superior noise barrier and reduces condensation.

This strong and stable construction features sleek, modern designs but is non-insulated.

RELIABLE, VERSATILE ALUMINIUM DOORS

- Very low maintenance.
- Durable in harsh weather conditions.
- Stable, strong and secure.
- Powder coated to the colour of your choice.
- Suitable for dark colours.
- 10 Year warranty for all weather.
- A wide range of designs are available at 50mm thickness or with enhanced acoustic properties.

Premium thermal insulation board.

Plastic thermal rotating connector allows the outside to expand and contract with the temperature difference between the inside and outside.

The ribbed panel to the outside gives the door a sturdy, stable and strong construction.

Image above: References the following Thermtek codes: FL/HV/VV/SV

Thermtek is Parkwood's own technology that enhances the doors' thermal properties. This helps to keep the warmth in during winter, and the heat out in summer.

DESIGN EXCELLENCE

Thermtek entry doors use Parkwood's patented thermal technology, combining fibreglass pultrusion and aluminium to create a best-in-class thermal break, resulting in the highest thermal ratings (Thermtek style codes containing FL/HV/VV/SV).

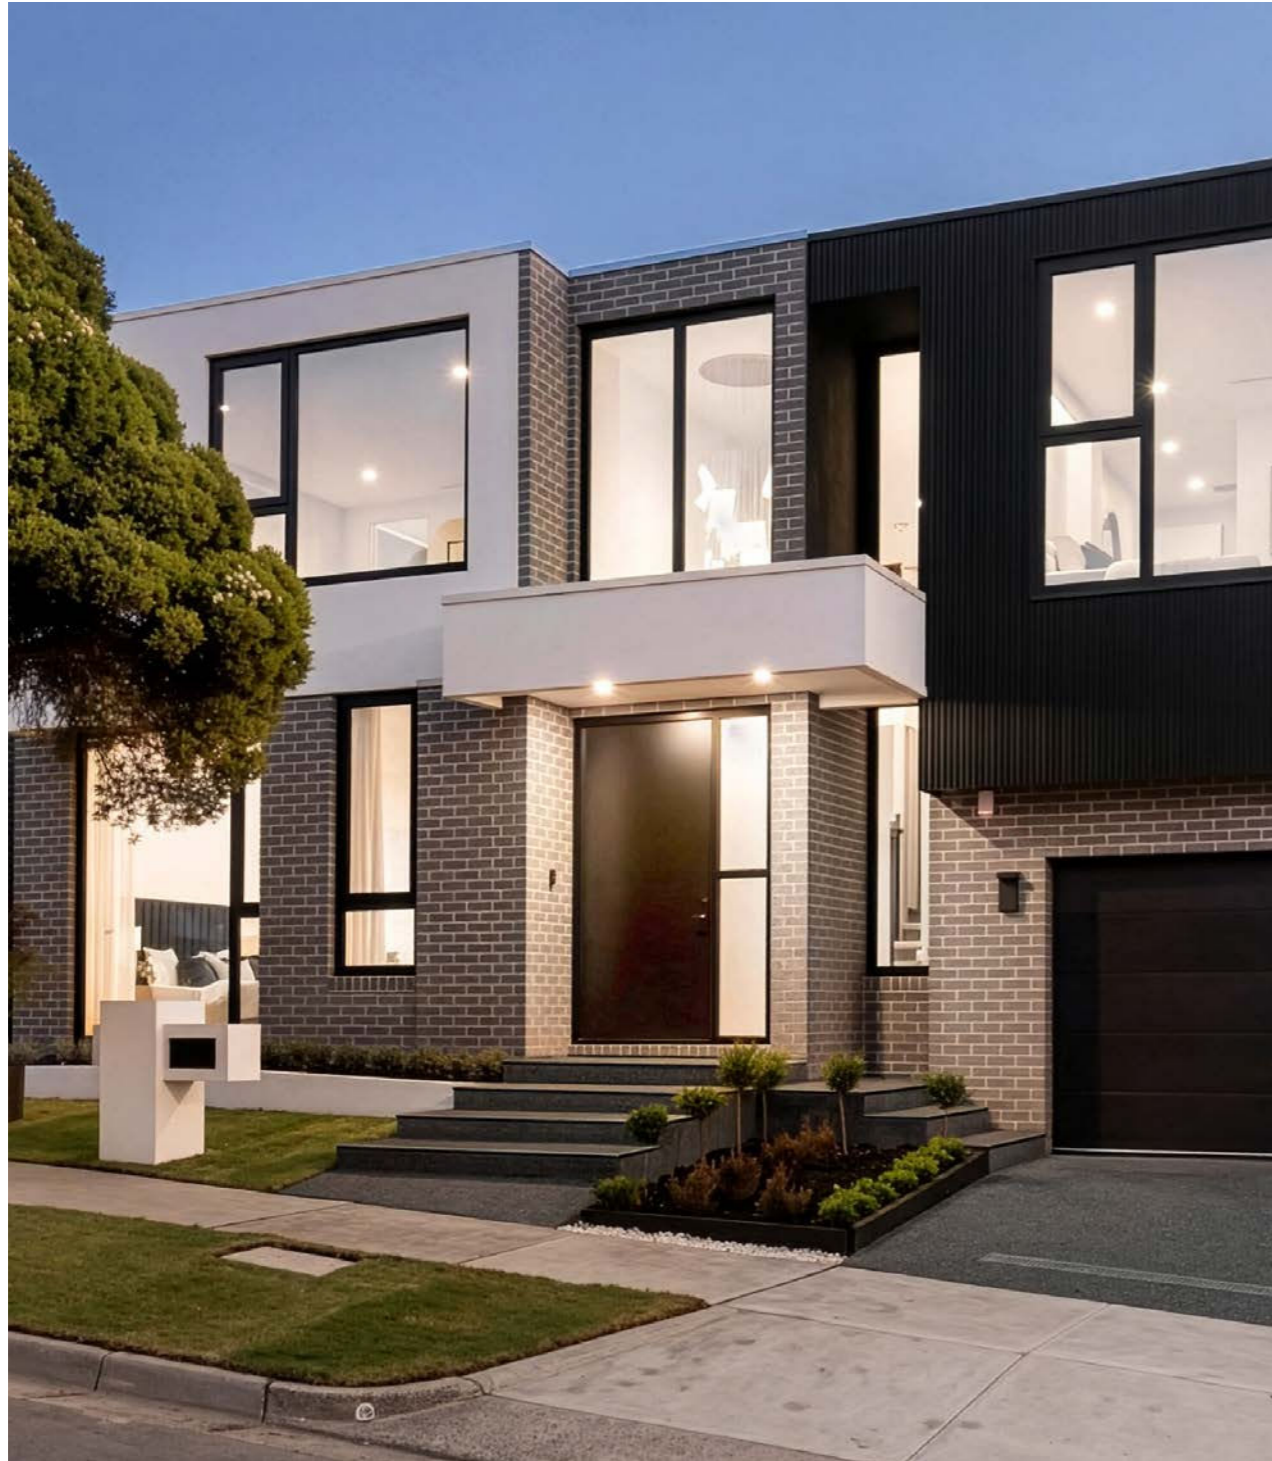

Pultrusion is an advanced composite material created using a combination of high-performance polymers and glass fibres, offering remarkable strength and thermal efficiency.

The pultrusion is seamlessly integrated with the doors' aluminium face, allowing them to slide independently when exposed to fluctuations in temperature. Unlike fixed polyamide thermal breaks from other manufacturers, this patented anti-bowing capability ensures the door doesn't bow. It's a unique feature found nowhere else in the world.

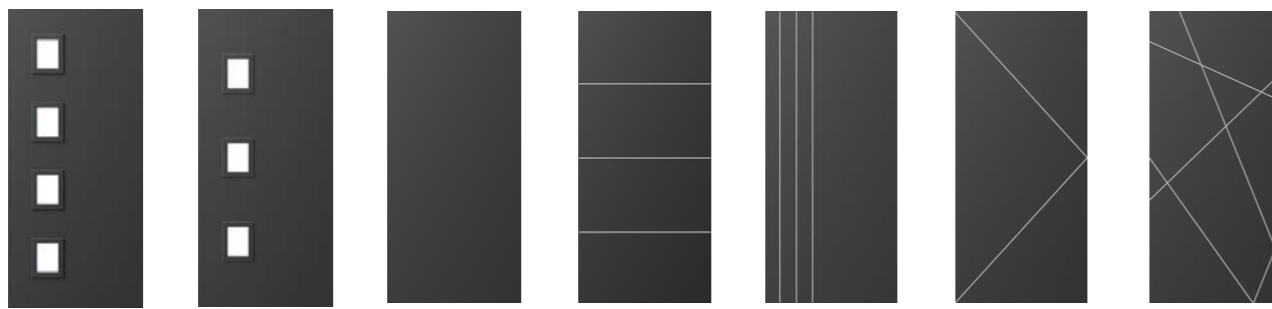

New Zealand Patent 789854,
Australian Patent 2022204602.

THE STRENGTH AND BEAUTY OF ALUMINIUM

- The beautiful powder coat finish is very low maintenance and compliments aluminium window joinery.
- Aluminium doors are durable in situations exposed to harsh weather, and won't move or bow.
- Most designs come in Thermtek or Strata constructions. Thermtek is Parkwood's own technology that enhances the doors thermal properties. This helps to keep the warmth in during winter, and the heat out in summer.

COMPOSITE

STRONG. SECURE. STYLISH.

Duramax composite doors offer the solid feel of timber but are weatherproof like aluminium. Unlike powder-coated options, they can be painted any colour. These doors resist rust, rot, twisting and denting and are engineered to withstand New Zealand's extreme weather.

THE PERFECT COMPOSITE CHOICE.

- 10 Year warranty for all weather.
- Advanced anti-bowing technology: fitted with pultrusion lock stile.
- Double glazed clear or etchlite.
- Many designs are available at 50mm thick.

LVL stiles & lock block for increased stability.

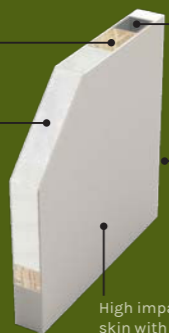

Polyurethane core for high insulation.

Fibreglass pultrusion inside lock stile to prevent bowing.

Solid PVC composite edges. Machinable.

High impact fibreglass skin with smooth finish.

DURAMAX +

PICTURED: FSVV00

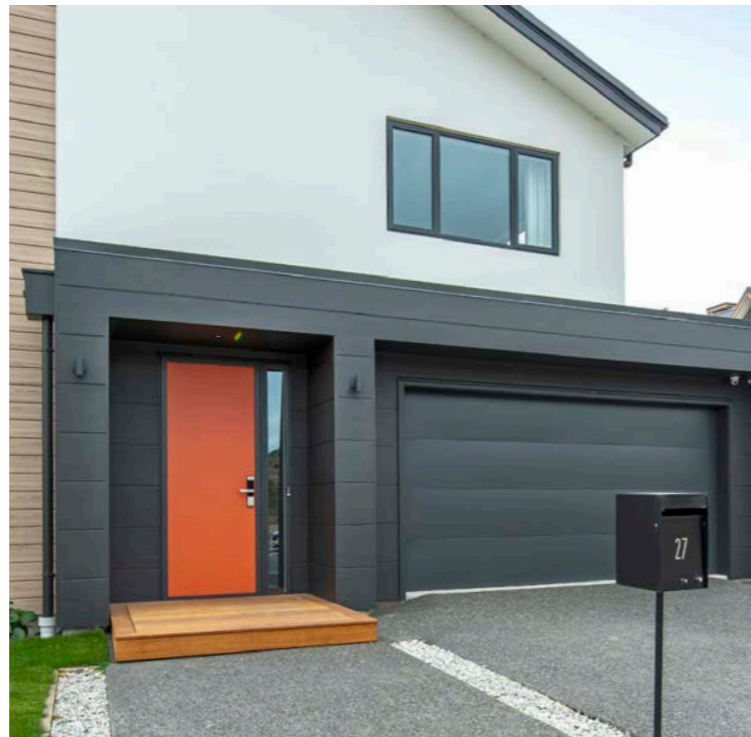

CHOOSE A SUPERIOR FINISH

- Can be painted any colour.
- These solid edges offer a minimalist look that can be easily trimmed or rebated.
- Polyurethane core for high insulation.

TIMBER

SOLID. CHARACTER. STYLE.

Our premium, hand-made timber doors are crafted by skilled artisans. Each door is crafted from timber that's been carefully chosen with colour-matching in mind - all custom made to your exact specifications.

NATURE AT ITS BEST, WITH ELEGANCE AND QUALITY

- Exterior doors - 41mm thick.
- Solid timber for better acoustic and thermal ratings.
- Can be painted or stained.
- High quality smooth finish.
- Character and style.
- Available in Cedar or Emberwood. Emberwood is a thermally modified timber which is more stable than pine.
- Timber doors are best suited for areas where they'll be protected from the elements. To ensure they're well-protected, they should have a porch roof that's at least 1.2m high and be finished with the right product—not oil. For more details, check out our website.

INTERIOR

CLASSIC, DURABLE, TIMELESS.

At Parkwood, we're passionate about creating spaces for families to celebrate life's moments. Each interior door we design and build is meticulously crafted, beautiful, and built to last.

Whether you're looking for something classic, timeless, or perhaps a more rustic look and feel, we have a range designed to compliment any home's interior.

SPECIFICATIONS INCLUDE:

- 38mm thick with 12mm thick MDF panels.
- Available in a range of timber types including quarter-sawn Pine, Cedar and Emberwood.
- Glazed doors available with clear or translucent laminate glass.
- All doors pre-eased.
- Custom sizes available.
